

Burgess A P

METAL CEILING SYSTEMS

Environmental Policy Statement

Burgess Architectural Products Ltd. is a leading manufacturer of metal suspended ceiling systems and raised access floor panels.

The supply process includes:-

- Delivery, storage and use of organic paints and solvents.
- Manufacturing, where metal products are cut, formed and fabricated.
- Pre-treatment of metal product and subsequent painting and curing,
- Packaging and storage of completed product where not immediately consigned to the customer.

Administration, manufacture, storage and despatch are all undertaken from our 2½ acre Hinckley site which includes a first class manufacturing facility of some 75000ft² supported by offices, yardage and warehousing facilities.

It is the Company's aim to implement and maintain an environmental policy, which will continue to address all relevant environmental legislation and regulatory practices and provide a framework for setting and reviewing objectives and targets at environmental management review meetings.

We will continue to monitor, control and review measures as necessary, in order to support ongoing improvements in:-

- Prevention of pollution.
- Disposal of waste process materials.
- Continued reduction of emissions to atmosphere.
- Energy and water conservation.
- Waste recycling.
- Continuation of environmental policies and intentions.
- Updating of policies to evolving legislation relative to our activities.
- Employee training.

The Management Team at Burgess Architectural Products Ltd., intend to continually review and improve where practicable, a policy consistent with the promotion of environmental awareness throughout the company and to foster at all levels, employee awareness of their environmental responsibilities.

R. J. Burke
